

Sandbag

DE [Sandsack](#) FR [Sac à sable](#)

The ballast for gas balloons is stored in sandbags.

Emptying

To give out ballast, sandbags are not dropped, on empty them. There is a handle on the bottom of the bag, to keep it. There are eyes on the top of the sandbag for the string connecting the bag with a hook.

The picture above shows the emptying of a sandbag. The sand is falling towards the earth.

Sandbag with a shovel

DE [Sandtasche](#)

In English, the bag, which hangs outside the basket and from which the sand is delivered in small quantities with a shovel, is also called a sand bag.

Storage

Inside the basket, the sandbags are connected to a rope. If possible, the sandbags are stored in the corners of the basket.
